Re: Generator Listing

Attention: Mr. Steven Kinser, Remedial Project Manager

Gentlemen:

Enclosed is one copy of the PCB Generator Listing for the Martha C. Rose Chemical Company site. The list was developed from the manifests obtained from the site records. The list includes the Record # (data entry number), generator's name, additional names of the companies and street and p.o. box addresses. The listing is presented in alphabetical order by generators name.

While the list can be considered fairly comprehensive we are proceeding to double check this listing against the Holden facilities processing records and the available financial records from American Steel. Additional generators may be discovered during this review. Concurrent with this review we will also research the companies listed to obtain missing addresses and the names of the heads of the companies. When we receive the database prepared by NEIC, this information will be integrated with it to provide a complete record database available for your use.

Please call should you have any questions concerning the generator listing.

Very truly yours,

BLACK & VEATCH
